VALUES:

Development

Responsibility

Cooperation

Strong brands and catering concepts are some of the cornerstones of success

- Baltic Restaurants has developed strong own brands that are well recognized in Latvia and Estonia:

Most well-known and mainly used in public sector and in staff canteens

Café and restaurant concept in shopping centres

Modern daytime restaurant in office buildings

Bistro for quick lunch options

Convenience type kiosks-catering outlets

Concept for café & restaurant at airport and ferries

...and operates Subway on franchise basis

- BR concepts are tailor made to meet client needs and could be modified. Since concepts and brands are created to serve the client, some of the concepts emerged and evolved based of the specific client requirements.
- In addition to strong representation in the public sector, BR operates cafes and restaurants, delivers banquets and caters events also in private sector (office centres, manufacturers, shopping centres, private schools).
