

**Leading expert of
Sustainable Solutions for Contaminated Sites
in Baltic States**

WHO WE ARE

WHAT WE DO

- Environmental Due Dilligence
- Site assessment
- Pollution management feasibility and BAT assessment
- Site remediation and decontamination
- Environmental training and consultations

ENVIRONMENTAL DUE DILLIGENCE (EDD)

Rapid, discrete site screening before decision of investment & site development (Phase I & Phase II)

An increasingly important part of the corporate due diligence process.

EDD is the specific processes in a transaction type setting (selling, buying, financing, insuring) relating to environmental issues and liabilities.

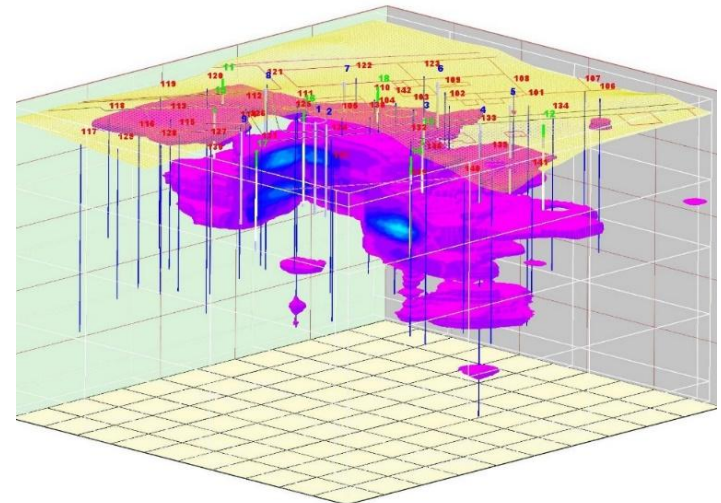

GEOECOLOGICAL SITE ASSESSMENT

VentEko offers comprehensive assessments to identify and mitigate environmental risks

UVOST® SERVICES

VentEko has unique Laser Induced Fluorescence (LIF) technology for detecting oil contamination in soil - UVOST®

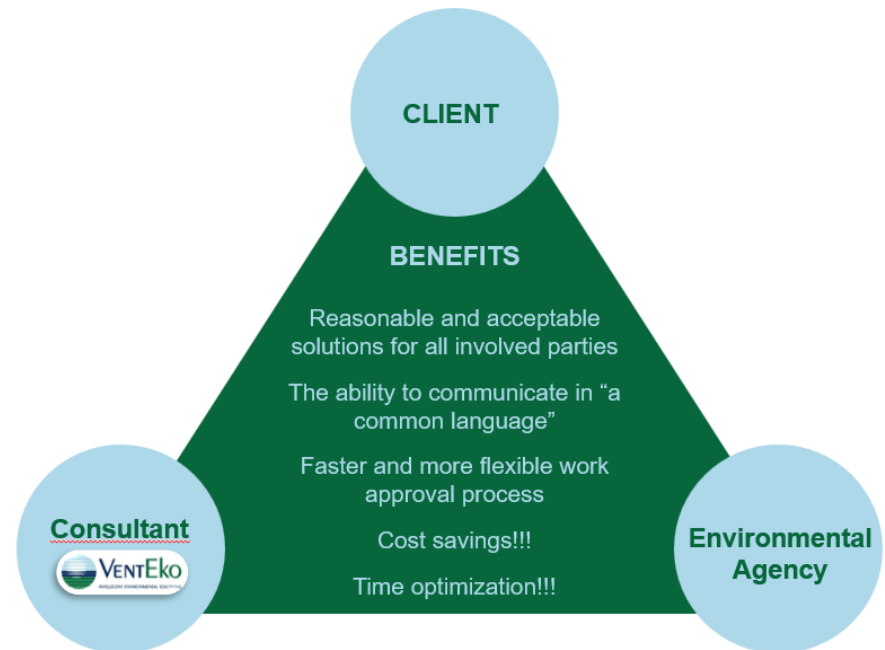

SOIL, SURFACE WATER AND GROUNDWATER REMEDIATION

- **Design and installation of permanent and mobile remediation systems.**
- **Use of mechanical, chemical and microbiological remediation methods, incl.:**
 - LNAPL (light non aqueous phase liquid) recovery;
 - Groundwater chemical decontamination;
 - Soil washing, ventilation and vapor extraction (*in situ*);
 - Soil solidification and stabilization;
 - Permeable reactive barriers.

ENVIRONMENTAL TRAINING AND CONSULTATIONS

- **Training and demonstration** of innovative investigation and remediation **technologies** for the staff of environmental regulatory institutions
- **Advisory services** for customers on how to implement **sustainable** environmental **management** principles in their daily operations
- Full spectre «turn-key» **services of management** for **transforming** contaminated land
